Susan Locke Interdisciplinary Capstone and Environmental Sustainability and Climate Change Initiative

As Americans brave conditions of fierce hurricanes, flooding, and fires, it is apparent climate change is an existential threat to humanity. The repercussions of climate denial are already here, and it is imperative that everyone become more engaged to preserve the planet for future generations. Over the years, Baruch faculty and students have been involved in various campus initiatives promoting a more sustainable, carbon-free environment.

This November 2020, Baruch College Weissman School of Arts and Sciences is launching a new promotional marketing campaign to raise awareness, educate and take action to confront climate change issues under the logo, “We Are Climate Action” WACA. This initiative launched by Weissman Communication in the Dean’s Office. It will include a lecture series introducing climate experts, including Weissman professors as well as outside guests who are nationally known for their work in environmental innovations and climate change policy. The initiative is designed to generate broad campus awareness with promotional support in all Baruch and CUNY communication platforms.

Academically, in the Spring 2021 semester a new climate change course and special program activities will be introduced that are supported by a grant from Susan Locke, Professor Emerita of Psychology at Weissman. Professor Locke has made a gift to support a team-taught seminar, the Locke Seminar, which brings together Environmental Studies and Art. It will be directed by Professor Emily Johnson, Assistant Professor of Journalism and the Susan Locke Grant coordinator. The course will be instructed by both professors Mindy Engle Friedman (Psychology) and Chester Zarnoch (Natural Sciences).

“Our mission is to give Baruch students the tools to be stewards of the world they inhabit, to connect them with nature, and to prepare them to be leaders in a greener, more sustainable future. The impacts of climate change are already here, and it is imperative that we act now to preserve the planet for future generations,” said Susan Locke. Read more.
